

To all commercial partners of
Gusstechnik Schopfheim GmbH & Co. KG

Schopfheim, July 2023

**Regulation (EC) No. 1907/2006
REACH – Registration, Evaluation and Authorisation of Chemicals**

Dear Sir or Madam,

Regulation (EC) No. 1907/2006 of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemical Substances is intended to simplify legislation applying to chemical substances across Europe and ensure their safe handling. REACH stands for Registration, Evaluation and Authorisation of Chemicals. Since June 2007, the regulation has governed the registration, evaluation and authorisation of chemical substances.

EU-based suppliers of substances and compounds used in certain quantities when processing our products are required under the regulation to notify us if the substances or compounds they supply contain “substances of very high concern” (SVHC) in a concentration higher than 0.1% by weight. The current list of “substances of very high concern” (SVHC) is available from the European Chemicals Agency (ECHA) website (<https://echa.europa.eu/de/candidate-list-table>).

Gusstechnik Schopfheim GmbH & Co. KG always takes its obligations under Regulation (EC) No. 1907/2006 very seriously – in its own interests, in the interests of safe handling of chemical substances, and in the interests of a high level of product safety. Should one of our suppliers notify us accordingly and we consequently become aware that our products may, in fact, contain “substances of very high concern” (SVHC) in a concentration higher than 0.1% by weight, we will advise you immediately in accordance with the requirements of Article 33 of Regulation (EC) No. 1907/2006.

If you have any further questions about how Regulation (EC) No. 1907/2006 is applied in our company, we would be delighted to assist.

Kind regards,
Gusstechnik Schopfheim GmbH & Co. KG
